Product	LivePremier Simulator
Date	April 08th, 2024
Version	4.00.13

The version (s) indicated here above has (have) been tested and validated by the QA Department.

Technical Notes:

Warnings

- **do not use LivePremier Simulator and Midra 4K or Alta Simulator simultaneously as erroneous behaviors may be encountered.**

- **when simulating LivePremier firmware v2.0.228 and above:**
  - **if the Basic Authentication feature is enabled without changing the password, the default password is the MAC address 11:22:33:44:55:66**

- **when simulating LivePremier firmware v2.3.103 and above:**
  - **do not disable both HTTP and HTTPS servers in the Remote Control settings of the device as it will result in the permanent loss of the session**

New Feature

- [MacOS] LivePremier firmware v4.00.254 is now supported on MacOS simulator

Evolution

- [Windows] Windows Firewall popup on the first use is now removed

Bug fixes

- Some external variables are now correctly simulated
- 8-plug cards are now correctly limited to HDCP1
- QSFP LEDS are now simulated correctly
- It is now possible to display the list of devices while the session is active

PREVIOUS VERSIONS

Product	LivePremier Simulator
Date	March 20th, 2024
Version	4.00.11

The version (s) indicated here above has (have) been tested and validated by the QA Department.

Technical Notes:

Warnings

- **do not use LivePremier Simulator and Midra 4K or Alta Simulator simultaneously as erroneous behaviors may be encountered.**

- **when simulating LivePremier firmware v2.0.228 and above:**
  - **if the Basic Authentication feature is enabled without changing the password, the default password is the MAC address 11:22:33:44:55:66**
