## TECHNICAL SPECIFICATIONS

## LITTER BINS

# DIN 50 L

### FEATURES

- The DIN litter bin is manufactured by injection moulding with high density polyethylene. The basket is designed with a smooth surface that facilitates cleaning and allows the litter bin to be customised with coats of arms, logos, etc. by using the thermo-printing system.
- The locking system of the litter bin is at the rear, fitted with a standard key, which makes it easy to remove the waste without having to remove the lid.
- The fixation system is made of high-strength technical plastic according to DIN 30713 standard and the litter bin holder is made of rust-treated sheet steel treated against rust.

### EQUIPMENT AND ACCESSORIES

- 50 L capacity body, made of high density injected polyethylene.
- Lid with front loading mouth, size available 310 x 90 mm.
- Fixing system made of technical plastic.
- Integrated cigarette extinguisher plate in the body of the litter bin, which makes it easier to extinguish the cigarette.
- On request, the litter bin can be supplied in a wide range of colours.
- Customisation by thermal printing or sticker on the body max. dimensions available: 200 x 200 mm.
