LITTER BINS

Italica 50 L

GENERAL FEATURES

- CONTENUR'S Agora Series litter bins are designed with vertical grooves that reinforce the whole and make it difficult to stick posters and stickers.
- Manufactured in cast aluminium, with linear polyethylene rotomoulding or using injected high-density polyethylene.
- All litter bins are fitted with a triangular lock and key for smooth and easy handling.
- The 80 L and 130 L capacity litter bins have a support base integrated into the body and are fixed to the pavement with six anchor brackets, 12 mm wide, whilst the 50 L litter bin includes a fixing system made of highly-resistant technical plastic.
- A basket able to hold 50, 65 and 120 L, fitted with a handle to facilitate handling of the litter bin during emptying.

EQUIPMENT AND ACCESSORIES

- The body and lid are injection moulded in solid coloured high-density polyethylene.
- Manufactured using environmentally-friendly recyclable materials.

- The 50 litre high-density polyethylene basket is fitted with a locking system, employing a standard triangular key, preventing access other than by collection and maintenance staff.
- The filling area is covered by a lid attached to the fixing bracket, providing almost 360 degrees of access for depositing litter.
- The fixing system, produced in engineered plastic, provides a robust frame that stays fixed inside the bin and facilitates easy installation to lampposts, posts and fences.
- The vandal-resistant post is made from I.H.A F- 112 steel tube and electro-plated to prevent rusting.
- A cigarette extinguisher integrated into the body of the litter bin to help put out cigarette butts.
- Upon request there is the possibility of customizing the litter bin with an outside ashtray on the lid of the litter bin.
- Island option: a litter bin island allows users to separate waste at source and facilitates a selective collection of waste. It is specifically designed for location in busy urban surroundings.
- Customisation with an embossing insert on the lid, 79 mm wide max.
