# Kheops

**Modular and ergonomic**

# Clever by design to optimise the waste capacity available

Modern design, efficient engineering,  
classic simplicity.

## Main features

### Ergonomic design:

Wide pedal for opening  
the bin from any angle.

### Multifunctional:

Waste compartment is  
adaptable to suit different  
waste streams e.g. glass,  
paper or card.

### Integration:

All accessories are  
integrated in the opening  
(with no external  
elements).

### Pneumatic spring:

for easy opening and  
closing of the waste  
compartment while  
guaranteeing an airtight  
seal.

### Professional door:

Large professional door  
for maintenance and  
bulky waste disposal.

### Access control:

Adapted to incorporate  
the access control  
system.

## Design

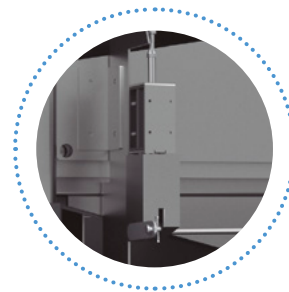

### Modular design:

Two cowlings assembled with all  
integrated components.

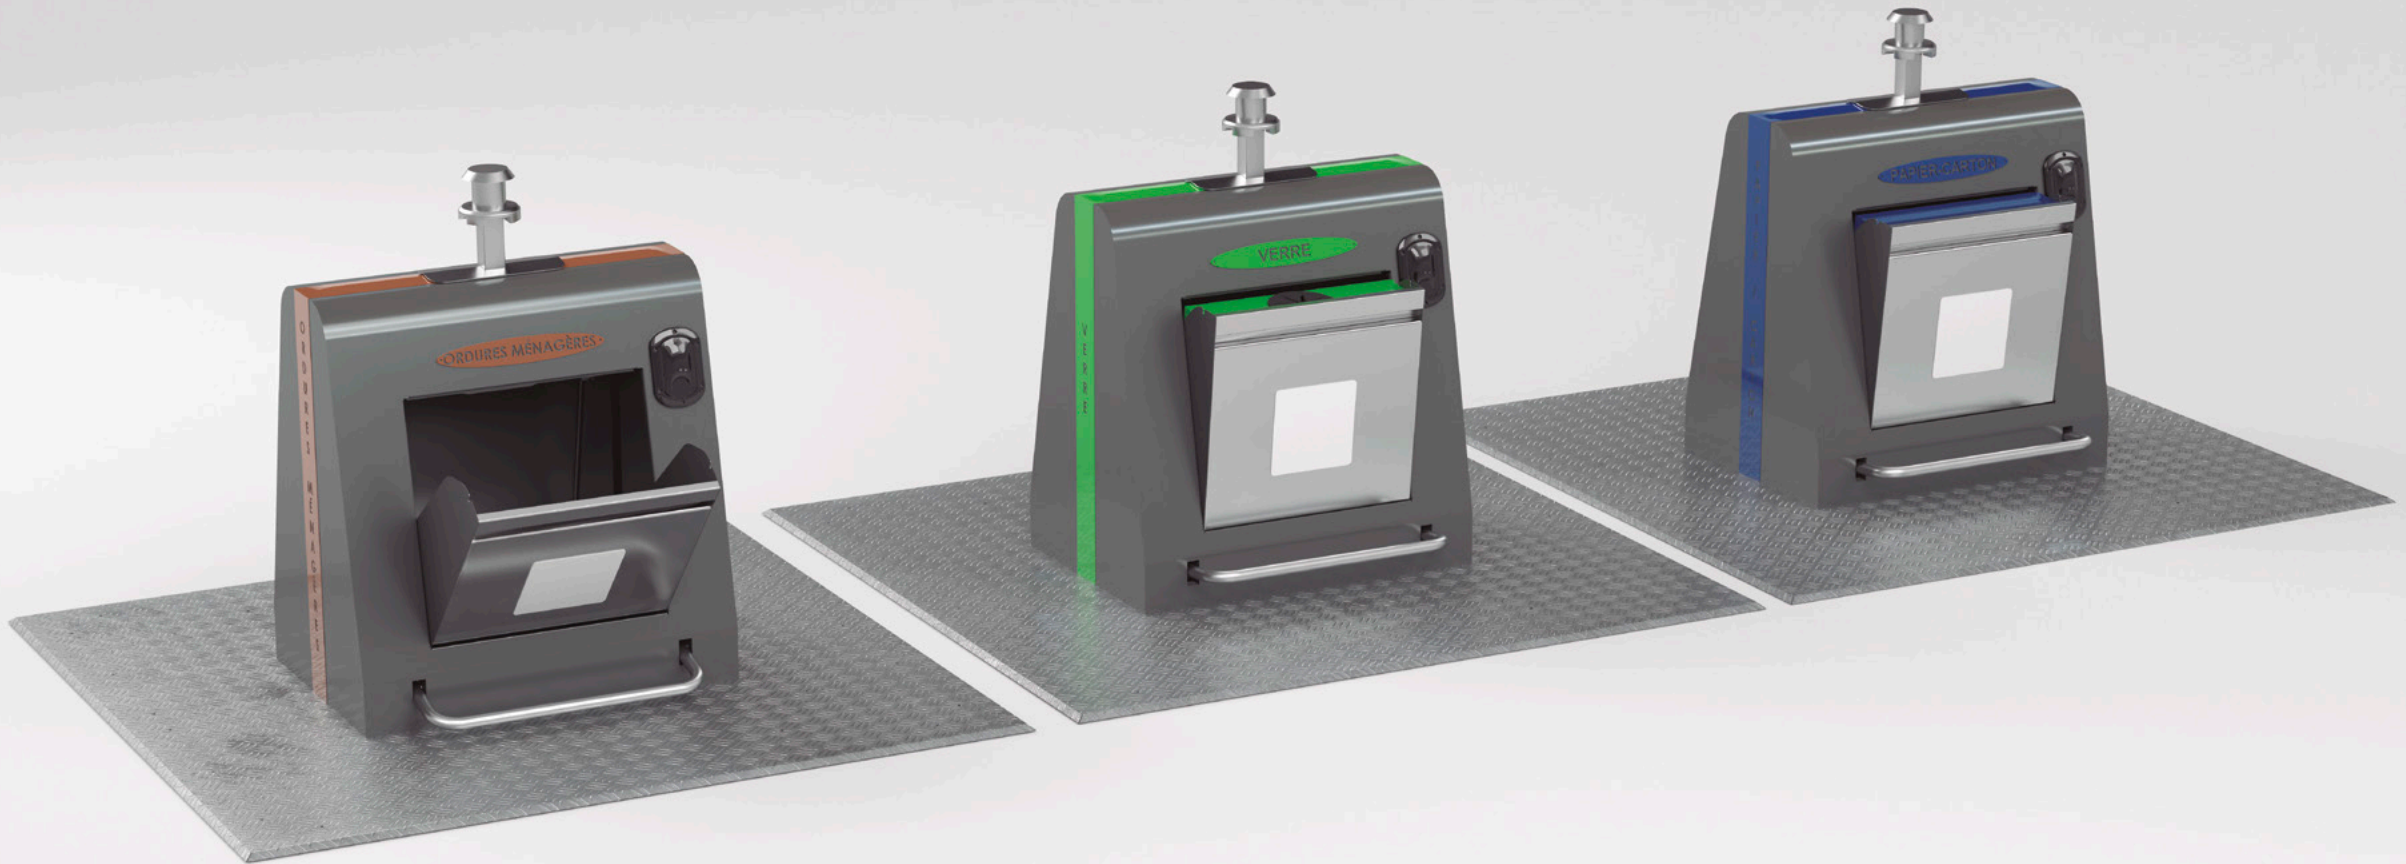

### Optimised capacity:

centred on the container for better  
distribution of waste inside the unit.

Manufactured in AISI  
304 stainless steel for  
durability and long-lasting  
rust resistance.

# Customisation

## **Hatch.**

Three waste compartment sizes: 80l, 100l and 120l.

## **Colours.**

Different colour options.

## **Locks.**

Two types of professional door locks available: AGA or Dirak.

## **Identification.**

Easy incorporation of waste identification plates.

## **Customisation.**

Column can include logos or recycling instructions can also be affixed.

# Maintenance and assembly

**Specifically designed** to make maintenance and the installation of spare parts easy and efficient.

**Maintenance needs are low** due to simple but effective design of components.
