TECHNICAL SPECIFICATIONS

LITTER BINS

Barcelona 70 L City

FEATURES

- Litter bin manufactured from perforated 1.5 mm thick steel plate, reinforced with two 30 x 15x 1.5 mm oval profile tubes on the upper and lower sections and a mortice lock to the side.
- With hot galvanised anti-corrosion treatment in ironoxide grey as standard. Powdered polyester finish.
- The upper and lower sections are 6 cm and the central section 16.5 cm.
- Incorporates a basket which swivels on a pivot, operated manually by unlocking a clamp.
- Base: 1.5 mm thick steel plate and 8mm perforations for drainage.
- Mounting post: oval shaped tubular structure 60 x 20 x 1.5mm.
- Fixing system: oval profile 60 x 20 x 1.5mm thick steel mounting post with a 17 mm perforation for an RFID chip.
- It is fixed to the ground by two base plates welded to the legs of the mounting post having 2 x 12 mm drill holes allowing the structure to be screwed to the ground using universal anchoring bolts, or M 10 x 80 mm screws in each of the 4 provided drill holes.
- Optional customisation by stamping.
