

### SIDE LOADING CONTAINERS

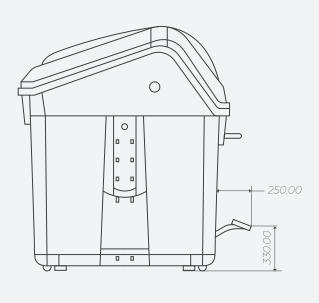

# C3200 F

#### **TECHNICAL SPECIFICATIONS**

#### SIDE LOADING CONTAINERS

## C3200 F

#### **FEATURES**

- CONTENUR side-loading containers stand out due to their ease of use and emptying. They can include Smart Elements, which provide real-time information.
- Injection-manufactured with high density polyethene and materials that respect the environment, they have the most demanding quality and product certifications.
- The CONTENUR side-loading containers are designed for easy, streamlined and efficient cleaning and maintenance in optimum operating conditions.
- No heavy metals in the pigments used.

#### **STANDARDS**

- Product Approval Certificate awarded by TÜV Service GmbH in accordance with European Regulation EN 12574.
- Accessibility certificate according to UNE EN standard 170001.

#### **EQUIPMENT AND ACCESSORIES**

- Ergonomic design that perfectly adapts to the different types of selective collection: paper and cardboard, glass, plastics, packaging, organic waste, etc.
- Shock absorber to safely and silently close the lid.
- Plastic guide bars to reduce the noise made during collection.
- Recess for the installation of electronic chips.
- Elimination of cables to open the lid, resulting in less equipment maintenance.
- Elastic sliders to better adapt the container to the ground.
- Openings with sizes and features specially designed to accommodate each type of waste.
- Standard equipped with reflective strips on the back of the body container for better visibility on the Street.
- Possibility of customising body and lid of the container with shields, logos, etc. using the thermal transfer graphic system or stickers.
- Customisation of body with thermal transfer graphic, maximum size: 400 x 400 mm.
