## DIMENSIONS

REAR-LOADING CONTAINERS – OTHER CONTAINERS

# Household Bin

## FEATURES

- Manufactured from virgin polypropylene, with protection against the combined effects of water and UV radiation.
- The containers are produced using environmentally friendly, fully recyclable materials.
- No heavy metals are used in the pigments.
- Adapted for selective household waste collection. Its compartmentalised system allows the bin to be divided into two or three separate sections.
- Retention system designed to prevent the metal handle from coming loose.
- The container body and lid can be customised with logos or other graphics using a thermal transfer printing system.
- Body customisation via thermal transfer graphics is available. Maximum size of 200 x 200 mm.
- Body customisation via integrated sticker is available. Maximum size of 340 x 250 mm.
- Lid customisation via integrated sticker is available. Maximum size of 160 x 230 mm.
- Integrated handle made of galvanised steel to facilitate handling.
- Ergonomic recesses on the base of the bin to make emptying easier.
- Available on request in a wide range of colours.
