EXABYTES CORPORATE CULTURE

Describing Exabytes Corporate Culture is never an easy task as it differs from the majority of "mainstream corporate culture". With over 200 members of staff in 7 departments, it is the special and unconventional corporate culture that bonds and shapes us to what we are today.
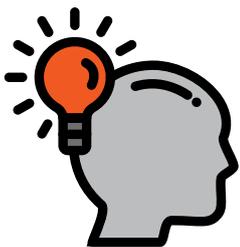

Transparency and Openness

The keys of a happy working environment, trust and teamwork thrive when there are no unnecessary speculations. Exabees are given incredibly huge flexibility and trust in executing their task as well as the opportunity to learn from mistakes.
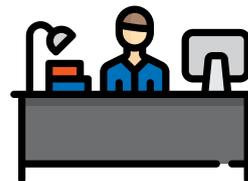

Always Customer First

As a service-oriented company, Exabytes espouses one service maxim for all exabees. Our products might not be 100% perfect, but we guarantee that we will serve our customer until they are 100% satisfied.

Creativity and Breaking Conventions

Our group of young and energetic bees, our ideas are exciting and sometimes unconventional. Managers and team leaders desire creativity and uniqueness in ideas and execution that emphasize practicality.

Light Hearted and Casual Working Environment.

It is true that at Exabytes managers and subordinates behave like friends rather than superiors and subordinates. And it is common for subordinates to joke or poke fun at managers or even the CEO.

Why Country Code Domain matter?

In international SEO, ccTLDs are the single strongest way to show search engines and users that site is specifically targeted to a certain country or region. Google assumes that site and all the content is relevant to the targeted geographic area and should appear on the right SERPs.

TLD Domain

Top-Level Domain Name Registration

.com	.net	.biz
.org	.store	.blog
