

2C2P is the leading Southeast Asia (SEA) payment service provider. We offer omni-channel payment solutions to companies across SEA, allowing them to accept payments through credit and debit cards, as well as through bank channels such as ATMs, internet banking and mobile banking. We also facilitate cash acceptance via payment counters, an important feature in SEA, a region characterized by low card penetration. With our comprehensive omni-channel solutions, merchants can now transact with both banked and unbanked customers.

INTELLIGENT, ROBUST & SECURE

By working with major global card associations, as well as with numerous acquiring banks across Asia, 2C2P has made transaction processing simpler, more efficient – and most importantly – a reality in many parts of Southeast Asia (SEA). Merchants can receive payments from anywhere in the world through our best-in-class gateway that integrates seamlessly with their businesses. 2C2P’s intelligent payment routing, robust fraud management and detailed business intelligence makes accepting payments safer and easier. Not only do your customers benefit from additional payment choices, including the option to pay through our comprehensive list of card networks and bank partners, but also from card on file and flexible installment payment plans, offered in conjunction with our leading bank partners.

ALTERNATIVE FORM OF PAYMENT: BUY ONLINE, PAY OFFLINE

2C2P provides “123” for businesses that strive to empower their customers, offering the ability to pay for purchases off-line, over-the-counter, at ATM, via Internet Banking or through online direct debit. “123” is a simple and secure payment method that uses a ubiquitous network of over 300,000 payment locations (cash collection points) throughout Southeast Asia. Customers making payment using “123” simply need to follow three steps to complete their transactions.
