

USO

For cleaning any surfaces.

Specially recommended for the clean after grouting ceramic tiles

FUNCTIONAL CHARACTERISTICS

LIGHT and high RESISTANCE.

Equipped with 2 squeeze rollers, with RIBS and HOLES for a faster draining of water.

Removable rollers for an EASIER cleaning.

Rollers' position is predetermine by two perforations in the upper profile of the tray. The rollers have two pivots that fix them to these holes, avoiding that the rollers can move during the draining.

Drain grid with reinforcement points to provide greater resistance to bending, and located in the bottom of the bucket, easy to remove and clean.

Longitudinal handle to allow a more comfortable and safe transport.

Rubber feet, which offer greater grip and stability.
