

### USE

- Prevents lippage during tiling, either in floor or wall installations.  
Recommended for 12 x 12" (30 x 30 cm) formats and above, always with back buttering.

### FEATURED CHARACTERISTICS

- Renewed and upgraded version of DELTA LEVEL SYSTEM wedges.
- Levelling system SUPERPRO quality.
- INSTALLATION PHASE: # 3
- Curved upper surface for a more even distribution of forces between the wedge and strip. It increases its useful life and the times it can be reused.
- Chamfers at the teeth's edges to improve stress distribution and prevent plasticization of the material of the wedge, for longer lifespan of the wedge.
- Chamfered upper corners of the wedge improve the stresses on the strip, avoiding premature strip breakage during installation.

### OTHER CHARACTERISTICS

- Ergonomic curved back surface, designed to avoid finger fatigue during prolonged use.
- Improved wedge insertion for a higher installation speed. Has a decreasing width in its front side that allows the wedge to be easily inserted into the window's strip with a certain inclination.

- Straight design of the base's end compatible with the future tile protector.
- RUBI logo for better differentiation.
- All the upgrades have been patented by RUBI.

### TECHNICAL SPECIFICATIONS

- Material: made of PP with mineral load
- Dimensions: 9,3x2,2x1,7 cm
- Reusables
