

Ref. 21998

USE

- Specially recommended for the cleaning after ceramic the tile installation work.

FUNCTIONAL CHARACTERISTICS

- Manufactured in injected polypropylene (PP), to offer a light and a high resistant washboy.
- Equipped with 2 grooved and high resistant squeezing rollers, to make easier the squeezing operation, leaving the sponges with the optimal humidity level.
- The roller brackets are reinforced, to make them more pressure-resistant during repeated wringing.
- The polypropylene (PP) draining grid features a series of reinforcement points to give it a greater bending resistance and is in the upper part of the washboy, as well as a decantation band which means that the water in the washboy is better used.
- The polypropylene (PP) handle is in a longitudinal position for a more comfortable and safer transportation.
- It is equipped with 2 large wheels, made of polypropylene (PP), to make handling easier when the washboy is filled with water.

TECHNICAL SPECIFICATIONS

- Maximum capacity: 24 litres.
- Useful capacity: 19 litres.
- Dimensions: 52 x 27 x 30 cm.

PACKAGING

- Served mounted in a single box.
- Box dimensions: 56 x 29 x 31 cm
- Box weight: 2.52 kg
- Available in a 10 units palbox (Ref. 69964)
 - o Dimensions: 57 x 33 x 112 cm
 - o Weight: 22.74 kg
- Available in an 18 units pallet:
 - o Dimensions: 120 x 100 x 115 cm
 - o Pallet weight: 63 kg
