

Ref.: 06986

Ref.: 06987

USE

- Professional high performance diamond conical milling bit made to perfectly edge and chamfer all kinds of porcelain, ceramic, natural stone such marble or granite, and sintered stone.
- Used to enlarge, lower or even holes after drilling. Facilitates the installation of cuffs, ex-tightened plumbing, led lights, etc.
Also used for polishing, cleaning, and bevelling existing holes.
Can be used to reduce the risk of cracks with standard and large format tiles subjected to tension.

Note:

This tool is NOT for making holes.

MAIN FEATURES

- SUPERPRO quality drill bit for dry use with M14 thread angle grinders
- High quality and concentration of diamond particles for a long-lasting life
- Diamond particles fixation through vacuum brazing process
- Suitable for natural stone and porcelain tiles

OTHER FEATURES

- Delivers a very good finish thanks to the grain size #50-60
- Stable performance with minimum deviation
- 2 existing references:
 - o 06986: Ø 2-35 mm
 - o 06987: Ø 20-48 m

TECHNICAL SPECIFICATIONS

- Working depth:
 - o 06986: 35 mm
 - o 06987: 32 mm
- Grinder connection: thread M14
- Recommended RPM range: 6000 - 11000

PACKAGING

- Sales unit: 1 unit
- Packaging: threaded plastic blister with protective foam
- Blister dimensions: Ø61.5 x 99.8 mm
- Weight:
 - 06986: 122.2 g
 - 06987: 263.2 g

NORM

- Complies with the standard: EN 13743:2007
