

Ref.: 06984

Ref.: 06985

USE

- Professional high performance diamond cylindrical milling bit made for grinding edges, making small chamfers, cleaning, and polishing existing holes, enlarging, or reshaping holes.
- Designed for a long life in porcelain, ceramic tiles, natural stone such marble or granite, and sintered stone.
Can also be used for landscaping materials.

Note:

This tool is NOT for making holes.

MAIN FEATURES

- SUPERPRO quality drill bit for dry use with M14 thread angle grinders
- High quality and concentration of diamond particles for a long-lasting life
- Holes in the body of the drill bit for a better diamond cooling and life prolonging
- Suitable for natural stone and porcelain tiles

OTHER FEATURES

- Diamond particles fixation through vacuum brazing process
- Delivers a very good finish thanks to the grain size #50-60
- Stable performance with minimum deviation
- 2 existing references:
 - o 06984: Ø 10 mm
 - o 06985: Ø 20 mm

TECHNICAL SPECIFICATIONS

- Working depth:
 - o 06984: 50 mm
 - o 06985: 50 mm
- Grinder connection: thread M14
- Recommended RPM range: 6000 – 11000

PACKAGING

- Sales unit: 1 unit
- Packaging: threaded plastic blister with protective foam
- Blister dimensions: Ø35 x 124 mm
- Weight:
 - 06984: 103.9 g
 - 06985: 150.5 g

NORM

- Complies with the standard: EN 13743:2007
