

**Ref: 28930**

USE

- Designed to remove the air trapped behind large size ceramic tile or stone slab during tiling.
- Helps achieve maximum wetting of the tile.
- Can be used alone or combined with a rubber mallet.

FUNCTIONAL CHARACTERISTICS

- SUPERPRO quality
- TPR soft bimaterial ergonomic handle that helps transfer the hitting power in the right direction in a comfortable and safe way.
- Increased force area to improve the full humectation rate.
- Chamfered corners to avoid hitting the edge of the piece and avoid possible breakage.

OTHER CHARACTERISTICS

- 16 mm thickened rubber, anti-aging and wear resistant.
- It's weight provides large hitting force, saving effort for the user.
- Anti-loose nut allows repeatedly beat firmly without falling off.
- Thanks to adhesive hardness 78HA can be repeatedly beat without deformation.

TECHNICAL SPECIFICATIONS

- Dimensions: 35.5 x 14.6 cm (14" x 5 ¾")
- Weight: 3.15 kg

PACKAGING

- Box dimensions: 36 x 15 x 25 cm
- Units in the box: 3
