

Ref: 72953

## USE

- Copies and transports, in a quick, simple and precise way, the position of the holes for pipes, water or electricity connections, electrical boxes, or any other element, from the wall to the ceramic, for subsequent cutting or drilling.

## FUNCTIONAL CHARACTERISTICS

- Maximum length of 45 cm is the maximum radius of action, from the reference corner.
- Must have placed at least 3 of the perimeter tiles to the hole to be marked. Place the triangular piece of the marker in the corner formed by the already installed tiles. Use the circular or square templates to find the exact point of the hole. Tighten the screw and lock the position found. Transport that measurement to a new tile, placing the triangular piece in the same corner from which we had taken the reference. Copy the hole position using the corresponding template.

## TECHNICAL SPECIFICATIONS

- Maximum length: 45 cm
- Weight: 240 g
- Color: red

## PACKAGING

- Sale unit: 1
- Box dimensions: 30.2 x 9 x 4 cm
- Weight: 330 g
- Units in the groupage box: 6
- Groupage box dimensions: 37 x 25.5 x 12 cm
- Box weight: 1.98 kg
