

USE

- Dry polish for smooth, uniform finish on hard materials like porcelain, granite, and sintered stone.
- For Polishing edges and small surfaces, ideal to perform mitres and bevels with angle grinder.

MAIN FEATURES

- PRO category grinding blade for dry use.
- Fast grinding thanks to Electro-Coating process where diamonds stand upright ready to grind and polish from the first moment.
- Long life because our flaps are fully impregnated with diamond that make it last long maintaining a high material removal rate. Unlike hybrid Flap wheels where diamonds are blended with silicon carbide or zirconia.
- The available grain sizes are:
 - #50/60 – ideal for the initial grinding phase, where you need to remove material.
 - #100/120 – for medium grinding
 - #200 – for polishing and fine finish

OTHER FEATURES

- Facilitates a subsequent polishing and buffing process.
- Inner diameter of standard Blade and is secured with the grinder's plate.
- No adaptor is needed. Just mount, grind, and finish.

TECHNICAL SPECS

- Outer diameter: 115 mm (32994 - FLAP WHEEL PRO 50/60)
(32995 - FLAP WHEEL PRO 100/120)
(32996 - FLAP WHEEL PRO 200)
125 mm (32997 - FLAP WHEEL PRO 50/60)
(32998 - FLAP WHEEL PRO 100/120)
(32999 - FLAP WHEEL PRO 200)
- Inner diameter: 22.2 mm
- Maximum recommended speed: 10,500 rpm (115 mm)
9,650 rpm (125 mm)

PACKAGING

Color carton

Sales unit: 1

Dimensions: 17.3 x 15 x 1.8 cm

Gross weight: 112 g (ref. 32994)
103 g (ref. 32995)
102 g (ref. 32996)
121 g (ref. 32997)
113 g (ref. 32998)
112 g (ref. 32999)

NORM

Under process (EN13743)
