

Refs: 32968 (115 mm)
32969 (125 mm)

USE

- MESH TURBO Dry-cutting blade specially designed for battery power tools such as the ANGLE TECH and TC-125 ENERGY.
- For cutting porcelain and other hard materials, natural stone, and sintered stone. It's not intended to cut thick materials.

MAIN FEATURES

- **SUPERPRO** category.
- Designed for **dry cut**.
- **High efficiency** diamond blade for cordless tools. Designed specifically for cordless angle grinders and TC-125 wireless cutters.
- **Maximizes battery life** without negatively affecting the blade (preventing glazing) and maintains cutting performance.
- **Ease of use** during cutting thanks to less friction, which significantly helps save energy.
- **High Precision** thanks to its reinforced core, low vibration during cutting.

OTHER FEATURES

- TURBO Viper design and a specific composition of the diamond bond to deliver very good finishes in dry cutting.
- Perfect for battery-powered tools such as grinders and cordless TC-125 models.
- Prevents the tool's motor from overworking, thus extending battery autonomy while keeping the diamonds consistently sharp during cutting.

TECHNICAL SPECIFICATIONS

- Maximum cutting thickness: 15 mm
- Rpm: 13.300 max (32968)
Rpm: 12.250 max (32969)
- Outer diameter of the blade: 115 – 125 mm (refs. 32968 – 32969)
- Blade inner diameter: 22.2 mm
- Blade thickness: 1.4 mm
- Diamond rim height: 10 mm

PACKAGING

- Colour carton
- Units per box: 5
